

The Topic

- I want to develop a website called Find Friends(F&F) in order for people to make friends with others.
- This website lets people register their information and hobbies and interests (music types, movie types, sports ...) to the database, and by searching for the same hobbies, it can show a list of persons who have the same hobbies and their contact information.

Audience

- The intended audience could be anyone who wants to make friends with others.

Design & Style

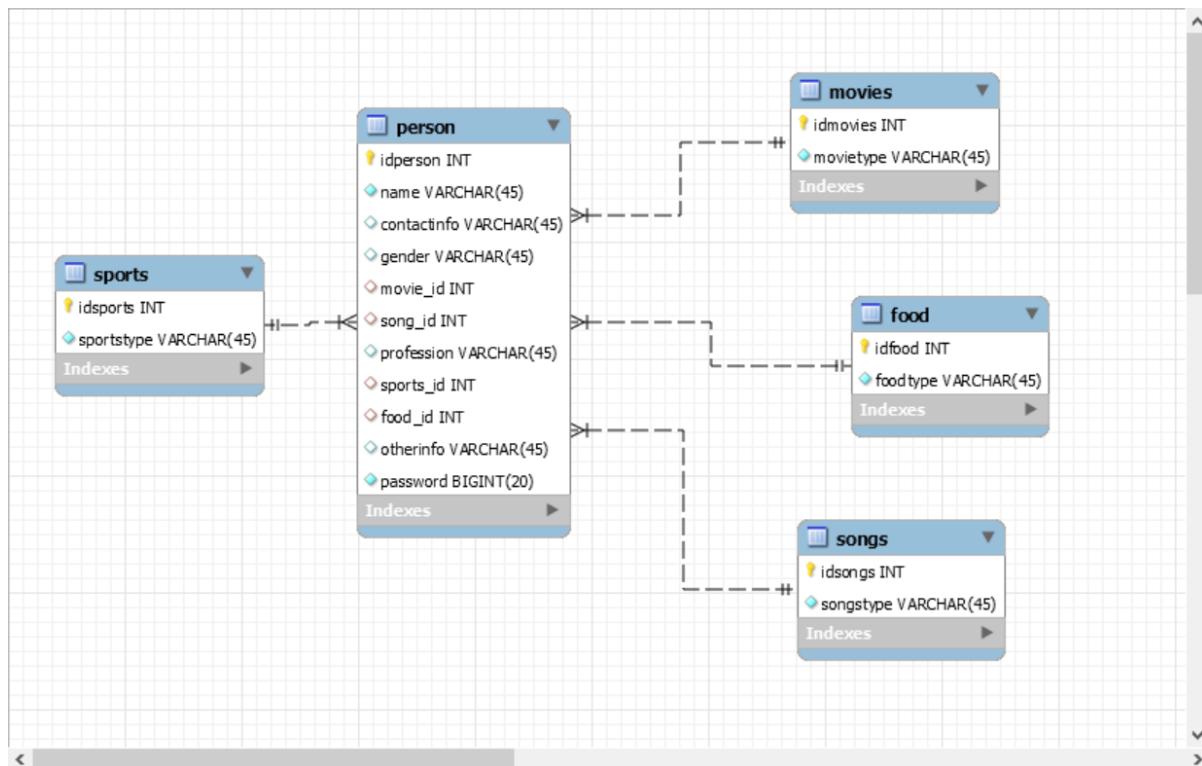

- Design will be simple and clean
- color choice
- inspiration1
- inspiration2
- inspiration3

5-Page Scope

- Login Page
- Register Page (The Page put in your profile)
- Edit Page
- Search page (Search for the friends)
- Result page

Database

- The people's name and their hobbies, store their id and password for logging in.
- For the people who registered in this website.
